mobifreedom

Shop Editor - Creating your own web site & publishing it via FTP.

This shows you how to create a web site from your MobiFreedom account, export & download it, then copy it to a web server of your choice. The only requirements is that your server is running PHP.
(If you don't have existing FTP software, you can download it free at http://filezilla-project.org/download.php These instructions are based on FileZilla.)

Login to your MobiFreedom account

↓

In 'Shop Front' choose 'Site Templates' & select required template via view button

↓

Select 'Choose this Site' after choosing a template & theme

↓

Enter the site name & click create

↓

Select 'My Sites'

↓

Click the 'Export' button then the 'Download' button when it appears

↓

Save to a folder on your PC & unzip/extract files to new folder

↓

Open FileZilla

↓

Select File - Site Manager - New Site

↓

Set the logon type to account

↓

mobifreedom

Enter your FTP servers user name, password & FTP server address where prompted to

Click 'connect to connect with your web host

When connected, select the extracted files from earlier & copy to your public web folder

Your new web site is now ready to view
