mobifreedom

Payment Cycle Explained (PayPal).

- Top level resellers can buy credits from MobiFreedom using their PayPal account.
- Resellers collect payments directly into their own Paypal accounts using the on-line system.
- Resellers can have sub accounts .

Simple purchase - One level chain example

You sign up as a reseller & buy account credits from MobiFreedom via PayPal e.g £1000

Your MobiFreedom account is then credited with £1000

An end user buys an unlocking code for £30 from you

Your PayPal account will be credited with £30

Your MobiFreedom account will be debited by your buying rate e.g £15. Leaving a balance of £985

Finally leaving a PayPal balance of £30 and a MobiFreedom balance of £985 A profit of £15 (£985+£30=£1015)

Payment history reports are available on-line.

Resellers with Reseller Sub Accounts

You sign up & buy account credits from MobiFreedom via PayPal e.g £10,000

Your MobiFreedom account is credited with £10,000

mobifreedom

(Note: You would be responsible for keeping sufficient credit to facilitate reseller B's £4000)

- All resellers will be notified by email when credits are low but you need to keep a positive balance to order unlocking codes or services.
- An Overdraft facility is available for business continuity. This can be set by your account controller.
